Capitol Square

Model Number	Dimensions	Construction
CS200-3 CS200-5 CS200-7 CS200-9	Various sizes available	2" Round steel tubing

New! The Capitol Square bicycle rack is 36" high and constructed of 2" square structural steel tubing. This allows for safe and secure bike parking because the square tubing acts as a deterrent to pipe cutters. This bike rack is ideal for locations where security is a particular concern.

The Capitol Square has the capacity to park up to 13 bikes and is available in a galvanized, powder coat, or stainless steel finish. Mounting options include in-ground or surface mounting.
