# Heavy Duty Challenger

Model Number	Dimensions	Construction
H36-3-G	Various sizes available	2 3/8" OD Structural steel tubing

The Heavy Duty Challenger bicycle parking rack is similar to the Heavy Duty Winder but has a height of 36" and is available in a galvanized, powder coat, or stainless steel finish.

The Heavy Duty Challenger's massive frame (2-3/8" OD structural steel tubing, 2" Schedule 40 pipe) is also suited to the most abusive institutional environment and allows the use of high security "U" locks to secure the frame of the bicycle to the rack. The Heavy Duty Challenger racks are available up to 21-bike capacity models for in-ground or surface mounting.
