All firepits are designed and constructed by individual artisans in the U.S. We use sustainable raw materials such as Recycled Steel, Recycled Aluminum, Reclaimed Hardwoods, and Eco-friendly degreasers which make everything 100% Post Consumer Recyclable.

Available in Aluminum Powder Coat, these products are made out of 5052 marine grade Aluminum which guarantee a no-rust, maintenance-free container. Perfect for placement on porous surfaces. Our aluminum is twice the thickness of steel, half the weight and twice as strong as steel.
