The Trenton indoor/outdoor receptacle presents a distinctive profile that provides ergonomic function with attractive design. A removable tilt-out bin is framed by a unique impact-resistant enclosure. This means the trash can be easily emptied from the bin without the need for vertical lifting or the hassles caused by moving parts.

The large capacity polyethylene receptacles feature an integrated rain bonnet, and houses a removable 50-gallon bin. Also included are a galvanized steel trash bag holder and a camlock to safely secure the bin to the outer frame. Impervious to moisture and highly resistant to corrosion, this tough receptacle is light in weight for easy upkeep.
