Triton Bike Rack

Model Number	Dimensions	Construction
TRI-5-G TRI-7-G TRI-10-G	3 DIFFERENT LENGTHS	2 3/8" OD STEEL TUBING

The Triton™ rack offers a new dimension to bicycle parking. The addition of triangle-shaped locking bars give bike owners maximum security – enabling bikes to be secured by frame and wheel with a single "U"-type lock.

Bike owners instinctively understand how to park at the Triton™. Bicycles can be parked on both sides of the triangle for maximum capacity in a minimum of space. The versatile Triton™ accepts all types of bikes, including tricycles, tandems, and trailers. The Triton's™ frame is made of heavy-duty 2-3/8" OD steel tubing and a 3/4" diameter solid steel rod. It can park up to 14 bikes and is available in a galvanized, powder coat, or powder coated stainless steel finish.
